SUMMARY: Full-stack Web Developer leveraging product strategy knowledge to build user-focused web-apps. Previous e-commerce startup co-founder and MS in Entrepreneurship. Quick-learning problem-solver with a multidisciplinary background and a knack for getting to the essence of decisions. Collaborative communicator.

TECHNICAL SKILLS

- Front-end: JavaScript, jQuery, HTML, CSS, Handlebars, REST APIs. Frameworks: React, Bootstrap & Foundation
- Back-End: Node.js, Git, Express, SQL, Sequelize, Heroku, MongoDB, Mongoose, IndexedDB, NoSQL, NPM, Axios

PROJECTS

Thanksgiving Together | <https://bit.ly/thanksgiving-together-github-repo> | <https://bit.ly/thanksgiving-together>
Project Manager, Full-Stack Developer

- Enhance your family's holiday Zoom call. Example use case: "Holiday games played remotely."
- Conducted user survey, configured MongoDB including schemas, wrote full MVC backend, implemented JSON web token authentication, created discussion topic button, scheduled sprints, led daily standup meetings.
- **Technologies Used:** JavaScript, React, NodeJS, Express, MongoDB, Mongoose, Axios, Heroku, Zoom SDK.

Zen App | <https://bit.ly/zen-app-github-repo> | <http://bit.ly/zen-app2020>
Project Manager, Back-end Developer

- Daily inspiring bullet journal with uplifting quotes. Example use case: "Starting the day off on the right foot."
- Managed Kanban board, GitHub repo, and daily standup meetings. Wrote four SQL database schemas, created user authentication, built login, signup, checklist, and HTML routes. Project awarded "Most Creative."
- **Technologies Used:** JavaScript, NodeJS, MySQL, Sequelize, Express, Heroku, Passport, bcrypt.js, Bootstrap.

USA Covid-19 Dashboard | <https://bit.ly/covid-tracker-github-repo> | <http://bit.ly/covid-dashboard-gp>
Lead Front-end Developer

- One-stop shop for Covid-19 data. Example use case: "How safe is it outside today?"
- Wrote project proposal, built responsive & accessible dashboard page, added clickable map. Managed Kanban board, GitHub issues, wrote Git workflow for branching/pull requests. Project awarded "Most Technical."
- **Technologies Used:** HTML, CSS, JavaScript, jQuery, Foundation, Chart.js, Google Maps & CoronaTracker APIs.

RECENT WORK EXPERIENCE

Lonely Produce **Seattle, WA**
Co-Founder 2018-2019

- Co-Founded Lonely Produce, an e-commerce platform for local farmers to sell their excess goods.
- Conducted user interviews with 10 farmers. Performed extensive strategy research and analysis.
- Guided a UX team of 3 from General Assembly in designing our marketplace web-app. Collaborated from conception through wire-framing to a clickable prototype.

EDUCATION

University of Washington – Coding Bootcamp **Seattle, WA**
